

# Step-by-Step with Modern Masters

GREEN PATINA | Candlestick

---

Hobby Lobby is the only store you need to visit to purchase all of the materials you need for this fun, easy, and lovely candlestick to accent any room in your home.

The Oxidizing Finish Kit includes all of the paint products needed to complete this large candlestick, and another one as well. Absolutely no experience is required to create the green patina finish that will make a real statement in your home, indoors and out. Even better, no sealer coat or further surface protection is necessary.

#### PRODUCTS NEEDED

- Modern Masters Green Patina Oxidizing Finish Kit
- Hobby Lobby Candlestick

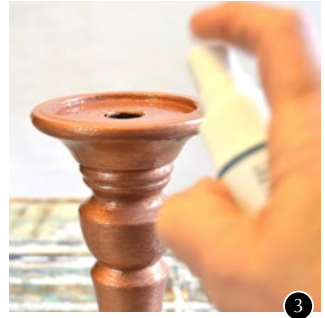

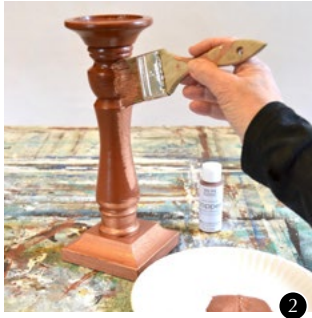

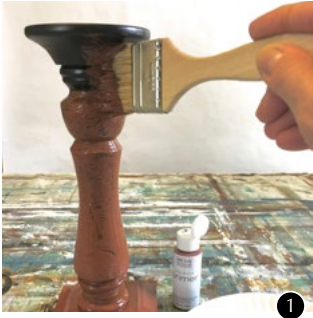

#### TOOLS NEEDED

- chip brushes
- cloth rags
- a palette for the paint (like a paper plate)
- surface protection materials, like old newspapers

# Step-by-Step with Modern Masters

GREEN PATINA | Candlestick

**STEP 1:** Protect surrounding surfaces from spills and overspray.

Using a chip brush, prime the candlestick with 2 coats of Primer. Allow ½ hour between coats, then 2 hours to dry fully.

**STEP 2:** Using a clean chip brush, paint the primed surface with 1 coat of Copper Paint, then allow ½ hour to dry.

**STEP 3:** Attach the spritzer cap to the patina bottle. Apply a second coat of Copper Paint. While the copper paint is still wet, spray on a light coating of Green Patina Solution over the entire surface.

Watch the gorgeous real green patina magically emerge as the activated surface dries over a period of 30 to 40 minutes.

*You are done!*

DO NOT ALLOW CHILDREN TO COMPLETE PROJECTS ALONE. ADULT SUPERVISION REQUIRED.
