

Hair Bow **HAPPINESS**

Iron-on rhinestone strips
perfectly fit a ribbon,
so **embellishing** a bow
has never been easier.

Rhinestone Bling Bows

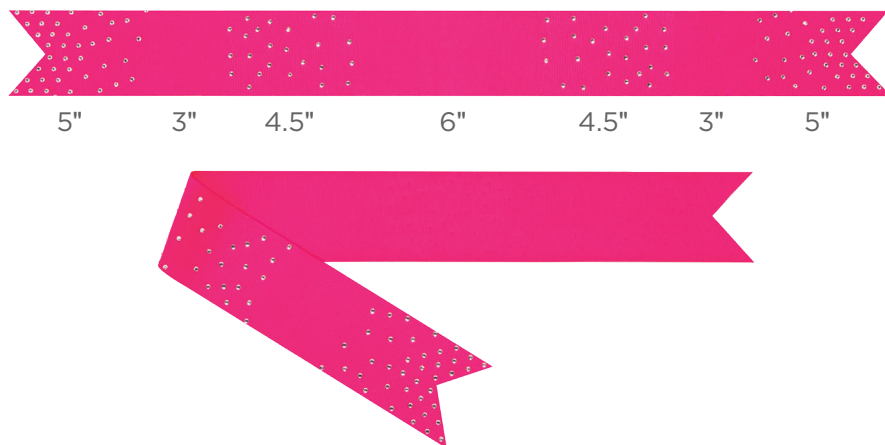

{ CREATIVE INSPIRATIONS *free* FROM HOBBY LOBBY® }

The Bow Basics

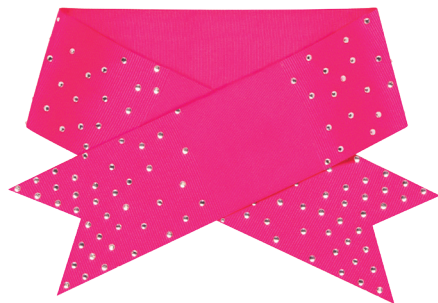

- 1 Remove protective backing from iron-on rhinestones and place adhesive-side down on ribbon (approximately 31 inches long). Iron according to manufacturer's instructions.

31" of ribbon

- 2 With ribbon right-side down, fold one tail over middle.

- 3 Cross remaining tail over other tail.

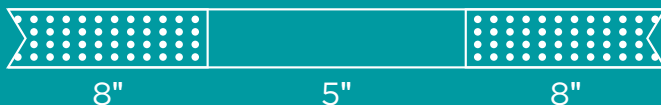

- 4 Gather and pinch ribbon together at center and stitch to secure.

Tip: Use ribbon to hide stitches by wrapping around center and securing.

Depending on the type of bow you're making, you may need to place your iron-on rhinestones in a different spot on the ribbon to make sure the sparkles show after the bow's been folded. Use this guide to place your rhinestones perfectly every time.

DO NOT ALLOW CHILDREN TO COMPLETE PROJECTS ALONE. ADULT SUPERVISION REQUIRED.
